

HELI

RELIABLE SPECIAL DESIGNED INSTRUMENT

Standard configuration	Optional	Optional
Hour meter	Overhead guard	Driver's cab
Horn	Standard fork	Warning light
Oil pressure alarm	Neutral gear switch	High air exhausting device
Control valve	Hydraulic circuit of filter	Double air cleaner
Wholly hydraulic powered steering	Electro-hydraulic charging over	Suspension seat
Rubber pad	Intelligent shift	Fork extension
Backrest	Speed limiting brake	Heater
Rear view mirror	Oil level gauge	Solid tyre
Front combined lamp (LED light)	Charging indicator	Widen fork carriage
Transmission of filter	Wide view mast	Wind shield
Engine flame out device	Air intake device	Purifying muffler
Ratchet type parking brake	Durable tire with decorative pattern	Fire extinguisher/muffler
Wear temperature meter	Lifting and tilting operating handles	Fire extinguisher
Driver's back	Traction pin	Rear working light
Rear combined lamp(LED)	Semi-suspension seat	Air conditioner (certain type)
Tilt lock valve	Hydraulic oil dipstick	OPS (travelling function)
Tilt adjustable steering column	Overhead guard rain cover	Torque converter of temperature meter
Back view mirror	Torque converter oil dipstick	Tilting cylinder sleeve
	Combined instrument	Steering cylinder sleeve

5-10 t G series
Internal Combustion
Counterbalanced Forklift Truck

HELI
LIFTING THE FUTURE

G series / INTELLIGENT ENVIRONMENT-FRIENDLY

5-10 t G series internal combustion counterbalanced forklift truck

Technical features remarkably improved

Damping

> With suspension damping structure on overhead guard(cab) and optimized design for the transmission, the whole truck's vibration reduced a lot and relieve driver's fatigue greatly.

Noise reduction

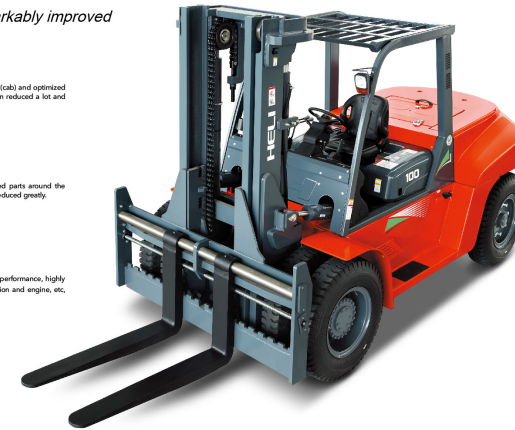

> Equipped with fully sealed cab and optimize designed parts around the engine, noise nearby ear and the truck sound level are reduced greatly.

Heat dissipation

> With the optimized cooling system and great cooling performance, highly improved the reliability and durability of the transmission and engine, etc., many key parts.

Energy efficiency

> With optimized hydraulic system, the truck is more energy-efficient and lower fuel consumption.

G series / INTELLIGENT ENVIRONMENT-FRIENDLY

Comfort

> Man-machine engineering design improves operation comfort; wide view lifting system improves vision.

Intelligent gear shifting

> With electronic-hydraulic reversing system as standard configuration, make operation more light and easy; The updated new intelligent gear shifting system could avoid starting with second gear, improves the transmission box's reliability.

Maintainability

> Wider internal space, more reasonable parts layout and 80°hood opening angle make maintenance easy.

Reliability

> Key parts like frame and mast apply CAE top-down design to improve their strength and make the truck tough.

Independent integrated electric cabinet

LED signal (standard configuration)

Ratchet type parking brake

Locked fuel tank cover

Fork

Rear axle braking strong with hydraulic pressure. Advantages: the convenient operation, stable braking and less tire wear.
